EDUCATION

University of Toulouse III (France) Bachelor of Mechanical Engineering 2021.09 - 2022.11

- Double Degree Program with Northeastern University (China)
- Relevant Coursework: Engineering Graphics, Mechanical Design, Fluid Mechanics, Continuum Mechanics, etc

Northeastern University (China) Bachelor of Materials Science and Engineering 2018.09 - 2022.06

- Double Degree Program with University of Toulouse III (France)
- Relevant Coursework: Material Mechanics, Physical Chemistry, Physical Properties of Materials, etc

WORK EXPERIENCE | SCHAEFFLER

- **R&D Mechanical Engineer | 2022.12 - Present**
- **Patent:** Multifunctional Support Structure for BMS Housing, Utility Model Patent - Insulation Structure Design

D5 Project - PDCU Platform Application

- Supported PDCU platform implementation for customers including Huawei, Geely and ChangAn
- Conducted customer requirement analysis, prepared drawing and technical documents, provided installation recommendations
- Resolved mass-production issues such as air leakage, warpage and dimensional deviations

D3 Project

- **ECU:** Selected connectors based on current requirements and defined the mechanical concept by considering thermal dissipation and protection requirements. Independently designed stamped upper and lower housings, released 2D/3D drawings, coordinated technical reviews with suppliers and supported cost reduction through thermal simulation
- **TCU:** Designed the die-cast upper housing, released drawings, coordinated with suppliers and PCB engineers

Platform Development - BMS Related Design

- Designed plastic housings and performed dimensional chain calculations
- Optimized structural design through mold flow analysis and contributed to 2 patents in fastening and insulation design

Technical Support for BMS OEM Projects

- Advised customers on material selection for coating, sealing, and insulation
- Solved DV test issues and supported prototype builds for BMU, CSC, 4G and HVM

PERSONAL SKILLS

- **Languages:** Chinese (Native), English (Working Proficiency), French (DEL F B2)
- **Software / Tools:** Creo, CATIA, Wise System, OMS System, IMDS & CAMDS System
- **Other Skills:** Mechanical structure design, thermal simulation, coordination of mold flow analysis, technical documentation preparation

PERSONAL SUMMARY

Mechanical engineer with Sino-French dual-degree background and hands-on experience in automotive electronics and BMS-related product development. Skilled in mechanical structure design, drawing release, supplier coordination, and mass-production issue resolution, with proven ability to work effectively in cross-functional and international environments.
