

Meihan Qian

Mechanical / Product Engineer

1287187051@qq.com | linkedin.com/in/qianmeihan | github.com/qianmeihan

PROFILE

Mechanical and product engineer with approximately four years of structural development experience across stamped, die-cast, and injection-molded components, technical reviews, and production support.

EXPERIENCE

Product Engineer | BMW Brilliance Project 2026 to present
Supports product engineering for a BMW Brilliance project, coordinating engineering changes and issue closure.

R&D Mechanical Engineer 2022 to 2026
Developed controller housings, mounting features, and insulation structures across design, validation, and production support.

SELECTED PROJECTS

D5 PDCU Platform Applications and Issue Closure PDCU
Supported structural adaptation and production issue closure for platform programs associated with Huawei, Geely, and Changan.

D3 ECU Stamped Housing and Thermal Management ECU
Developed stamped housings, connector interfaces, and insulation structures, using thermal analysis to support heat-path optimization.

BMS and CSC Injection-Molded Housing Development BMS + CSC
Developed molded housings, mounting features, and snap fits, using tolerance chains and mold-flow findings to improve assembly.

PUBLISHED PATENT

Electronic Device CN223978857U
Uses a strip groove and snap-fit structure to retain the housing and PCB while considering assembly reliability and creepage distance.

EDUCATION

Northeastern University 2018 to 2022
Bachelor of Engineering in Materials Science and Engineering

Université Toulouse III 2018 to 2022
Dual-degree studies in Mechanical Engineering

SKILLS

Structures: stamped, die-cast, and molded components; Methods: GD&T, tolerance chains, thermal and mold-flow coordination; Tools: CATIA, Creo, AutoCAD; Languages: Chinese, English, French B2.
